Tony Murray

APPROVED

Denca appoints Technical Services Manager

Widnes-based industrial control technologies specialists, Denca Controls, have appointed Tony Murray, 57, as Technical Services Manager.

Tony was previously employed as Site Electrical Engineer, with responsibility for calibration, at Colgate Palmolive, Trafford Park. He will use his considerable expertise surrounding manufacturing systems, HV distribution networks, control and automation technologies and calibration of critical instrumentation to further enhance the technical services that Denca is able to offer its customers.

Comments Denca Joint Managing Director, Alan Brennan, “We are delighted to have been able to secure the services of an individual with such outstanding expertise of manufacturing processes and control systems. In particular, Tony’s in-depth knowledge of calibration will help to further endorse Denca’s reputation as the ‘calibration partners of choice’ for numerous industries.”

As the recognised calibration partner of a considerable number of organisations across the food, manufacturing, fine chemicals, pharmaceuticals, automotive and power generating sectors, Denca provides a whole range of calibration services to UKAS (United Kingdom Accreditation Service) standards.

Denca’s UKAS testing capabilities include: Temperature, Pressure, Level, Flow, Analytical and Weighing Systems.

A reputation for quality and value

Established in 1995, Denca Controls Ltd. has become renowned for delivering high quality, value-for-money solutions that enhance performance and embrace leading-edge instrumentation, electrical design and software engineering technologies. The company is recognised across numerous industrial sectors as 'the integrators of choice' and regularly secures repeat business from a wide range of organisations across the automotive, chemical, food & beverage, healthcare, pharmaceuticals and utilities industries. Working with clients of all sizes, Denca provides process control solutions based on custom-designed, fully integrated PLC and HMI software for both mechanical and electrical operations as well as UKAS-traceable calibration and certification services. Denca is committed to the delivery of imaginative, cost-efficient control systems and process automation systems that make a positive impact on production performance.
